I just got off of the phone with Mark out at the site. Due to equipment problem with the LGP dozer the only thing going on at the site today is waste haul and dump. The asbestos waste has been completely bedded/covered with existing demo waste. They should be done with hauling and placing all the existing demo waste tomorrow PM. I will make one last trip to the site early tomorrow afternoon to get photos of the asbestos bedding/cover. Do you want Tetra Tech EM Inc. to oversee the placement of the interim temporary cover if and when they install it?
